

Species list

Wildlife of Lake Bindegolly National Park

This list is of the mammals, reptiles and amphibians known to occur in Lake Bindegolly National Park. A separate list has been prepared for birds.

Compiled from the observations of Environmental Protection Agency staff, other researchers and bird-watching groups, this list is by no means complete. Records of additional species would be appreciated.

Letter(s) in brackets following each name indicate the habitat(s) in which the species is most likely to be found. Habitat information is only intended to provide a guide to the major habitats utilised by each species.

M = Mulga
L = Lakes/swamps/rivers
S = Samphire flats
D = Dunefield shrublands
C = Clay pans
